

VOTE NO TO ANY VACCINE MANDATE PROPOSED

On 1/18/22 Council will be voting on a measure to require vaccine papers to allow citizens the right to enter restaurants, bars, etc..

The idea is to stop the spread of this virus and work towards a 'zero case' goal.

That goal is medically impossible using mandates or any other dictatorial measure for control. Just look at other countries trying to achieve that goal – The UK, Australia, Canada, etc..

This virus variant cannot be controlled by any vaccine or booster. And has proven to be mild for both vaccinated and unvaccinated citizens. The hospitalizations and deaths attributed to this variant are related more to a persons state of health (co-morbidities) than the virus itself. That fact has been declared by the CDC just last week.

The citizens of this county (highly vaccinated) must continue to protect themselves just as they would during a highly contagious flu season (no mandates).

I implore you to vote NO to any vaccine passport mandates and allow your citizens to protect themselves in the manner they wish to avoid serious illness.
